

CLAIMS BORDEREAUX INTEGRITY

Clean claims data. Before it becomes a problem.

TrueBind maps, validates and reconciles claims bordereaux before they reach carriers, giving teams clear evidence of what was checked and what was not.

Run a Bordereau Health Check

See TrueBind in action

Works alongside your existing TPA files, inboxes and carrier templates.

Source values are never rewritten. Unmapped and unassessed data is reported, not hidden.

THE PROBLEM

Every sender has a format. Every format has its own mistakes.

Harbour MGA

Claims_Aug26_FINAL_v3.xlsx

Cim No.	DOL	Paid £	Total Inc
HBR-0004	12/05/2026	18,400.00	24,500.00
HBR-0008	04/06/2026	9,800.00	15,000.00
HBR-0011		1,120.00	2,000.00

Incurred doesn't add up · loss date missing

Kestrel TPA

bdx_0826.csv

CLAIM_ID	LOSS_DT	PAID_TD	INC_TOT
KT-22817	2026-05-19	12812	49898
KT-22817	2026-05-19	12812	49898
KT-22840	2026-06-02	640	2000

Same row sent twice · no reporting period

Norland Claims

Norland Aug.xlsx · 3 sheets

Claim Reference	Date of Loss	Paid to Date	Incurred
NC/3391	06/28/2026	£2,480	£38,980
NC/3392	28 Jun 26	£0	£132.50
NC/3395	01.07.2026	£410	£500

Three date formats in one column

Rework

↺ and back to the sender

Today the first person to find the error is often the carrier — after the deadline, in a query, weeks after the file was sent.

TRUEBIND

The same files. One audited path.

Every file, from any sender or channel, runs the same steps. Each step leaves evidence.

Harbour MGA · xlsxKestrel TPA · csvNorland Claims · 3 sheets

01 Map

Columns matched to Lloyd's CRS v5.2 by alias rules first. AI only proposes headers the rules can't place — never cell values. You confirm before anything is validated.

- Cim No. → claim_reference
- LOSS_DT → date_of_loss
- Adj Notes → unmapped

02 Validate

Arithmetic, required data, dates and formats checked on every row. Each finding cites its sheet, row, field and rule.

- row 5 · incurred 39,171.00 ≠ 37,671.00
- row 9 · insured name missing
- row 26 · 03/04/2026 ambiguous

03 Reconcile

Exact resubmissions kept apart from legitimate claim development. Nothing is merged or removed automatically.

- HBR-0006 · rows 7 & 22 · exact
- HBR-0019 · Jul → Aug · development

04 Audit

Every action, by a person or the system, is hash-chained. Any later edit or deletion breaks the chain and is detected.

- #112 workbook read · mapping proposed
- #113 mapping v3 confirmed by molly
- chain intact · 116 entries

PRODUCT

The application, not an illustration of it.

Open the product →

Intake

Any sender's layout. Every sheet read, header rows found.

Work queue

Everything waiting on a person, most urgent first.

Exceptions

Each finding with evidence and the next step.

Duplicates

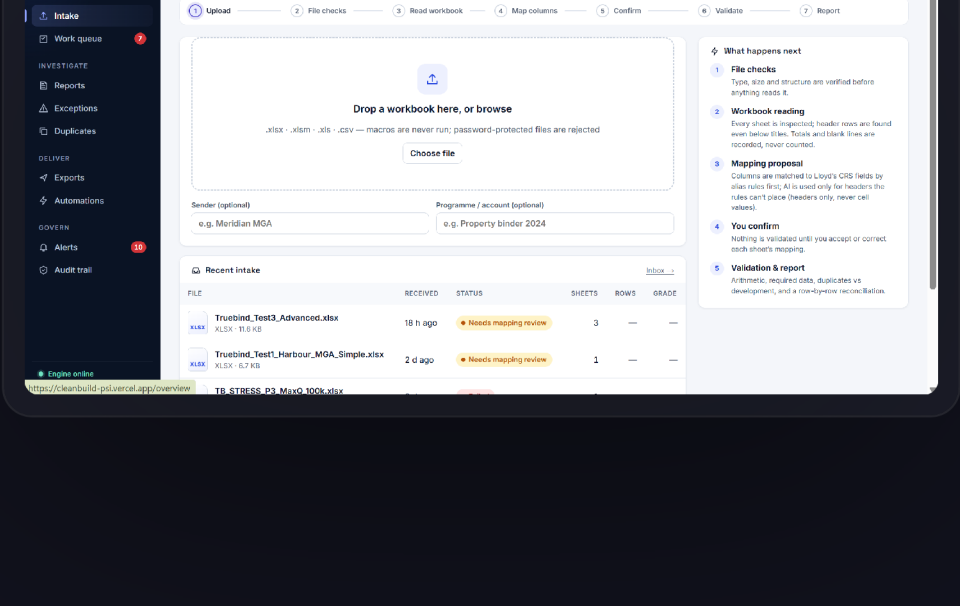

Resubmissions separated from development.

Automations

Live channels shown as live; planned as planned.

Audit trail

Hash-chained. Nothing changed without a record.

Current TrueBind build, captured September 2026.

BORDEREAU HEALTH CHECK

Send one bordereau. Get back a report you can forward.

What was checked, what was flagged, what couldn't be mapped and what wasn't assessed — with the evidence. Ready for your COO, Head of Claims, carrier or auditor.
